7 Grading checklist 2

1 Introduction

This report presents the solution to the Series 03 assignment (**data wrangling and ANOVA**), produced as a Quarto notebook and fully version-controlled with Git.

- **GitHub repository:** Isah1875/IEAP-Series03-RStudio
- **Course:** IEAP – RStudio, Series 03 (Instructor: Denis Mottet)
- **Author:** Isah Dadiga

2 Git workflow strategy

(to be completed later — how we used branches and commits)

3 Challenges and lessons learned

(to be completed later)

4 Data sources

(to be completed later — dataset description and URL)

5 Scientific references

(to be completed later — references with DOIs)

6 Questions

6.1 Test: sub-document include

This section lives in a separate file (`sections/00-test.qmd`) and is pulled into the master document at render time with the `{{< include >}}` shortcode — exactly the structure the assignment requires.

#| label: test-addition 1 + 1

7 Grading checklist

- ☐ README.md complete
- ☐ LICENSE file present
- ☐ Master Quarto document with sub-document includes
- ☐ PDF rendered and uploaded
- ☐ At least one commit per question
- ☐ Principled use of branches
